Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage. *Persona: Riya, a hobbyist storyteller who wants to turn a story idea into an illustrated comic.*

Phase of Journey	Stage 1 Discover & Enter Idea	Stage 2 Generate & Customize	Stage 3 Preview & Export
Actions <i>What does the customer do?</i>	- Opens the ComicCraft home page. - Types a story prompt, e.g. "A brave fox exploring an enchanted forest". - Picks character name, setting, tone and art style.	- Submits the form and waits while the comic is generated. - Reads the 5-panel story and looks at the images. - Switches tone or art style (e.g. funny, comic book) and regenerates.	- Reviews the full comic on the preview page. - Clicks to download the comic as a PDF. - Prints the PDF or shares it with friends.
Touchpoint <i>What part of the service do they interact with?</i>	- Home page input form (index.html). - Text box and tone / art-style options. - Submit button.	/generate route on the FastAPI backend. - Gemini Flash (outline), Gemini Pro (story) and Stable Diffusion (images). - Loading / waiting screen.	- Comic preview page (comic_preview.html). - Layout builder and FPDF exporter. - Export success page (export_success.html).
Customer Thought <i>What is the customer thinking?</i>	"Can it really turn my idea into a comic?" "Which tone and style suit my story?" "No drawing needed, so this looks easy."	"Will the pictures match my story?" "Is it still working? This is taking a while." "Let me try a funnier tone."	"This looks like what I imagined!" "I can save it as a PDF to keep." "My friends will love this."
Customer Feeling <i>What is the customer feeling?</i>	Curious and hopeful, but slightly unsure whether the AI will understand her idea.	Anxious while waiting, then excited and impressed as the panels appear.	Proud, satisfied and delighted to share her finished comic.

Process Ownership <i>Who is in the lead on this?</i>	• User (Riya) provides the idea. • S.HARINI and K.PRAVEENA (Frontend) own the input form and templates.	• V.SHRIMADHESH (Backend / AI) owns routes.py and the Gemini and Stable Diffusion integration. • User reviews and refines.	• R.POOJA owns layout_builder.py and exporters.py. • K.PRAVEENA owns the preview and success pages.
Opportunities <i>How can we improve this stage?</i>	• Add example prompts and hints. • Offer character and genre presets. • Validate inputs and guide the user.	• Show a progress indicator per panel. • Keep characters consistent across panels. • Allow regenerating a single panel.	• Let users edit panel text before export. • Add more formats (PNG) and a share link. • Save comics to a personal gallery.
