Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Customer, Payment Gateway).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Order).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., Customer Database, Inventory).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

ComicCraft Data Flow Diagram

The diagram on the next page applies these symbols to ComicCraft. It shows how data moves between the User, the external AI services (Gemini Flash, Gemini Pro and Stable Diffusion), the six ComicCraft processes and the two data stores (panel images and exported PDFs).

ComicCraft – Data Flow Diagram
