

Empathy Map

Date	29/09/2026
Team ID	UNM1425 ComicCraft
Project Name	ComicCraft – AI Comic Story Creator using Gemini Models
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS “I have lots of story ideas, but I can’t draw them.” “Can it turn my idea into a full comic in minutes?” “I want it funny and in a comic-book style. Can I change that?” “I’d love a PDF I can print or share.”	THINKS - Will the AI understand my idea and keep the story consistent? - Will the pictures actually match the story text? - Will it be easy to use without any design skills? - Hiring an artist is too costly and slow.
DOES - Fills in the story prompt, character name, setting, tone and art style. - Reviews the comic preview and regenerates with a different tone or style. - Downloads the finished comic as a PDF to print or share. - Has tried generic templates that offer little creative control.	RIYA <i>(Hobbyist Storyteller)</i> FEELS - Frustrated that she can’t draw her own ideas. - Excited and curious to see her story come alive. - Anxious that the result may not match her vision. - Proud and satisfied when the comic looks as imagined.
